Re: Surcharge Rate Changes

As of December 16, 2016, the South Valley Water Reclamation Facility (SVWRF) Executive Board adopted the rate structure proposed in the Pretreatment Surcharge Rate Study performed by JWO Engineering.

The following rates will be implemented as of July 1, 2017:

The new Commercial/Industrial surcharge fee for Biological Oxygen Demand (BOD) will be \$.19/lb for each pound discharged above a concentration of 200 mg/L.

The new Commercial/Industrial surcharge fee for Total Suspended Solids (TSS) will be \$.15/lb for each pound discharged above a concentration of 230 mg/L.

The new Commercial/Industrial surcharge fee for Oil & Grease (animal/vegetable based) will be \$.26/lb for each pound discharged above a concentration of 100 mg/L.

Please forward this information to anyone affiliated with the billing to ensure they are aware of the surcharge rate increases!

If you have any questions please contact SVWRF Pretreatment at 801-495-5465.

Sincerely,

Spencer Parkinson
Pretreatment Director
